**DETAILED ACTION**

1. This office action is in response to Application No. 10/711,965 filed on 10/15/2004.

2. Claims 1-20 are pending.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8, 10-14 and 16-20 are rejected under 35 U.S.C. 102 (e) as being anticipated by Morrison et al U.S. Pat. No. 6,329,920.

As per claims 1, 3-8, 10, 11-14 and 16-20 Morrison discloses an apparatus/method for reading radio frequency identification transponders used for livestock identification and data collection, the method comprising:

Receiving user account data from a transaction application stored on a RF module for use in transaction completion, the RF module in physical and logical communication with a nontraditional transaction device microprocessor, and processing the user account data for transaction completion (see., abstract, col 2-col 6). Please note that it is inherent to recognize that the RF of Morrison can also process user account data since the inventive concept of Morrison is for livestock data collection and management.

Art Unit: 3621

As per claim 2 Morrison discloses the claimed method wherein said receiving the user account data from the RF module, where the user account data is provided subsequent to authentication of an end user secondary identifier, the secondary identifier being provided for authentication by the end user at the a mobile device interface (see., abstract, col 6, lines 17-32, specifically external device can also be a mobile device interface).

***Allowable Subject Matter***

**5. Claims 9 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.**

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The examiner can normally be reached on 6:30 to 5:00.
